<https://leetcode.com/u/chicoumbetov> (163 solved | Rank 700 080)

SKILLS

Mobile Development: React Native (iOS, Android, Web), Expo, Redux, UI/UX, Cross Platform Development

Programming Languages: JavaScript, TypeScript, Python, SQL, C#. (C++ Learning)

Backend & Cloud: NodeJS, MicroServices, .Net,, PostgreSQL, MongoDB, Google Cloud, AWS, Azure, CI/CD, Docker, Git, Cloudflare

Expertise: Data Structures & Algorithms, Cross-Platform Development, Large-Scale Systems, AI-powered applications (ai-chat-x)

EXPERIENCE

Trace Software International (Group Trace) Company | Software Engineer

September 2023 – present | France, Le Havre

- Developed an electrical schema builder from scratch, improving computation time by 40% using advanced algorithms and deployed across 4 subsidiaries
- Built a high-performance UI with React, Redux-Saga, and Vitest, integrated CI/CD pipelines via Azure DevOps
- Optimized system scalability using Redis caching to handle high-load environments

BIMandCO (Group Trace) Company | Software Engineer

August 2022 – August 2023 | France, Paris

- Built a data analytics service using React.js & JavaScript, enhancing user engagement insights
- Refactored **legacy UI codebase**, improving performance and scalability.
- Fixed legacy and optimized a user authorization system in order to improve User Experience

Global Climate Initiative Company | Software Engineering

France, Nice | March 2022 – July 2022

- Developed an optimization algorithm for carbon emission reduction simulations UI (Javascript, React JS, Redux)
- Migrated a **legacy real-time messenger system** from jQuery to RabbitMQ-based architecture, reducing API response latency

Web Premiere Company | Software Engineering

April 2021 -February 2022 | France, Mazamet

- **Developed cross-platform UI applications** (iOS, Android, Web) with React Native, serving over 10,000+ users.
- Build scalable frontend solutions for B2C applications such as Omedom (multi-property management <https://app.omedom.com>) and Scanflock (telemedicine platform <https://app.scanflock.com>)
- Integrated real-time video calling and document generation to enhance user interactivity

PROJECT

Karavan App: https://t.me/karavan_app_bot Telegram Mini App exposing <https://immi-guide.app>

- Developed a real-time logistics optimization system for package deliveries via travelers
- Built **full-stack UI** with React Native (iOS, Android, Web) & integrated **WebSockets** for real-time interactions
- Automated chat scanning across multiple Telegram supergroups using Cloudflare Workers, AWS Lambda, and cron jobs
- Implemented user analytics tracking (page visits, engagement metrics) and email notifications (Gmail/Nodemailer)
- Led end-to-end lifecycle stages, from UI/UX designers, product research, implementation to deployment

EDUCATION

Master's Degree in Sciences & Technologies, Université de Poitiers, France

2017 – 2019

GPA 3.65/4.0
